

NH-ISAC's CORE BENEFIT

NH-ISAC is a trusted global community and member forum for coordinating, collaborating and sharing vital **Physical and Cyber Threat Intelligence**.

NH-ISAC members share information on what they are seeing on a real-time basis every day and are able to take that shared intelligence and use it in their own environments to **create situational awareness, inform risk-based decision-making and mitigate against threats**. This type of sharing helps increase the resilience of the healthcare sector and public health critical infrastructure.

In addition, members share best practices, strategies and other valuable information with each other.

AUTOMATED INFORMATION SHARING

Machine speed software solutions designed to facilitate the collection of cyber threat intelligence from various sources, utilizing a universal language and transportation protocol. Data is received from member entities such as governments, law enforcement, other ISACs, global CERTs and Intelligence partners.

EDUCATION and AWARENESS

NH-ISAC hosts numerous workshops, webinars and summits.

CYBER EDUCATION:

Global Workshops on various relevant topics
Roadshow Series with partners on Ransomware and Business Email Compromise (BEC)
Current workshops are listed at <http://nhisac.org>

WEBINARS: Member and/or Sponsor hosted hot topics.

Ransomware Mitigation Techniques
Shared Best Practices
Information Security

NH-ISAC BI-ANNUAL SUMMITS:

Table Top Exercises and Discussion Panels
Medical Device and Technical Tracks
Case Studies, Tactics, Techniques & Procedures
(See next page for a list of upcoming summits)

INFORMATION SHARING

Threat Alerts (TLP Amber, Green and White)
Daily Security Intelligence Reports
Threat Intel Committee: (TIC) Member-driven cyber threat landscape analysis
Legal & Regulatory weekly *Hacking Healthcare* blog (TLP Amber version of blog for members)
Communication: Private sharing groups for Pharma/Providers/Payers; Best Practices & Mitigation
Member Discussion Boards
Member Portal: Documents Repository
NH-ISAC Radio discussions and podcast access
Benchmarking for peer comparison of IT Security
Complimentary Okta and Trusona security tools.
Perch: Community Defense Platform — discount
Working Group Whitepapers
NH-ISAC Monthly Newsletter
<https://nhisac.org/nh-isac-newsletters/>
MD VIPER (Medical Device Vulnerability Intelligence Program for Valuation & Response)
<https://mdvipr.org/>

COLLABORATION and NETWORKING

COLLABORATIVE FORUMS: See Next Page

Provides NH-ISAC member organizations affordable access to shared data and enhanced security services

PREFERRED MEMBER RATE SERVICES:

- ❖ Shared Risk Assessment Platform including Third Party Risk
- ❖ Security Operations Services including Vulnerability Management, Penetration Testing, Incident Response and Malware Analysis
- ❖ IP/Domain/Digital Risk Range Monitoring (One year free)
- ❖ SAFE-BioPharma Digital Identity and Signature Standard

CYBERFIT Quarterly Newsletter

<https://nhisac.org/cyberfit/cyberfit-newsletter-archive/>
Learn more at <https://nhisac.org/cyberfit/>

Collaborative Forums: NH-ISAC members form working groups to discuss hot topics, collaborate on whitepapers, and share best practices and mitigation strategies. Most working groups meet online once a month and in person at biannual NH-ISAC Summits. Members are encouraged to join one or several, or to start a group on a new topic of interest. For more information go to <https://nhisac.org/nh-isac-membership/>

Upcoming NH-ISAC Summits

- ✦ Fall 2018: November 26-29, San Antonio, TX
- ✦ Spring 2019: May 13-16, Ponte Vedra Beach, FL
- ✦ Fall 2019: December 2-5, San Diego, CA
- ✦ Spring 2020: May 10-14, Palm Harbor, FL
- ✦ Fall 2020: November 30-December 3, Phoenix, AZ
- ✦ Spring 2021: May 16-20, Naples, FL

More info at <https://nhisac.org/summits/>

Medical Device Security Information Sharing Council (MDSISC)

Develop solutions, identify best practices and facilitate the exchange of information that will result in a more efficient and secure use of medical devices and. The group has a listserver that provides a mechanism for the sharing within the community and holds meetings and workshops. Medical Device track at Summits.

Provider Special Interest Council

Shares ideas and generates white papers and current solutions to address the new technology within the provider community.

e-Discovery Working Group

The Electronic Information Discovery and Litigation Security Group identifies emerging risks in Litigation processes including eDiscovery collections, processing and production/sharing.

Cybersecurity Analytics Working Group

A public/private collaborative comprised of healthcare industry information security leaders committed to the development of advanced threat detection methods. Leverages MITRE's Adversary Tactics, Techniques & Common Knowledge (ATT&CK) framework.

Pharma and Supply Council

Finds innovative ways to detect cyber security risks to the delivery of medical care supplies and lower the risk to the organization that may be vulnerable to attacks by former employees, contractors, or potential hackers who look to compromise critical systems.

Payers Working Group

Collaborates and shares strategies of managing payer-specific Cybersecurity risks and acknowledging real business impacts.

IS Risk Management Working Group

Share experiences, tactics, wins, and challenges within the risk management community to evolve our collective capabilities and enable the focus of our organizations.

Identity & Authentication Working Group

Collaborates and shares strategies and innovations surrounding identity and authentication.

GDPR Working Group

General Data Protection Regulation (GDPR) is a legal framework that sets guidelines for the collection and processing of personal information of individuals within the European Union (EU). This group shares best practices, processes, and standards in the spirit of coming together as an industry in preparation for the GDPR coming into effect.

General Data Protection Regulation (GDPR) Working Group

Share best practices, processes, and standards in the spirit of coming together as an industry in preparation for the GDPR coming into effect in EU on May 25, 2018.

Emergent Healthcare Identity and Authentication (EHIA)

Establishes expectations for functionality of health care identity and authentication with the NH-ISAC membership and identifies industry activities that are furthering this work. The model aligns with the goals of the 2011 Presidential Directive for a National Strategy for Trusted Identities in Cyberspace (NSTIC).

Cybersecurity Education & Awareness

Committee Developing a mechanism whereby members can share ideas and tangible assets that can be leveraged to support the cybersecurity education and awareness programs of our NH-ISAC member community.

Business Resiliency Committee (BRC)

Developing strategic direction for the ISAC community to anticipate and prepare for threats. Addresses the needs, issues and challenges – particularly to small and mid-sized organizations - in building resiliency in respect to business continuity, disaster recovery, major incident response and crisis management.

IS Incident Response Working Group

Shares experiences, tactics, wins, and challenges to evolve our collective incident response capabilities and develop robust, sustainable programs in order to minimize incident damage.

Third Party Risk Governance Working Group (TPRG)

Share and learn best practices to mitigate risks posed by third parties. Improve efficiency and effectiveness of third party risk management operating components.

Cloud Security Working Group

Develops solutions, identifies best practices and facilitates the exchange of information that will result in a more efficient and secure use of cloud services and related practices.
