www.infosecuregroup.com

www.securityforum.org

The Belgian ISSA Chapter is very proud to announce a full day international conference on Reaching Payment Card Industry Data Security Standard (PCI-DSS) Compliance and Certification. Many companies nowadays understand that compliance with this standard is necessary for survival. However, most of them are still struggling on the road towards compliance and certification. The purpose of this conference is to help them! Indeed we can count on very knowledgeable international speakers who are prepared to come and share their real-life experience with all of

you. During a whole day, multiple aspects of this subject are focused upon, covering the view of the various players involved. On an event like this, you will have the opportunity to meet with peers. From all corners of the EU, people will meet to network, exchange information, share knowledge and provide you with tips and tricks.

Don't miss this event! Book the 11th of October 2007 in your diary for a day in Brussels and register today! Participants are welcomed from 8.30 on and we start at 9.30.

The Audience

The event is targeted at those (management, security professionals, auditors, consultants, ...) involved in implementing the PCI-DSS standard in order to reach compliance and

certification. Whether you are new to it, or experienced, our speakers will provide you with useful, real-life information and you will have the opportunity to find what you are looking for.

The Program

Topics that will be covered include:

- PCI DSS Update (Steve Hubbard – MasterCard Worldwide)
- PCI DSS: The view from a QSA (Ciske Van Oosten – Trustwave)
- Measuring and Reporting PCI Compliance (Pierre Noël – IBM)
- PCI DSS: The ASV point of view (Dieter Sarrazyn – Aszure)
- Be prepared before bringing expensive external auditors in (Sissel Thomassen - Infosecure Group)
- PCI DSS Case Studies (Claudio Scarabello and Gunther Bloemen - Verizon Business Solutions)

The detailed agenda will be soon available on www.issa-be.org.

Speakers

👤 **Steve Hubbard**

Steve is responsible for the day to day management of MasterCard's SecureCode and Site Data Protection services and aspects all of eCommerce payments and security for Europe. He has extensive experience in the payment processing arena, covering Card Acquiring, low & high value payments and money transmission.

Steve joined MasterCard in May 2006. Before joining MasterCard he spent 17 years in the banking industry with HSBC in the UK undertaking a number of roles and management positions. Most recently he delivered a global Internet Payment Gateway solution for HSBC and previously managed operational departments covering payments & cash management.

👤 **Ciske Van Oosten**

Ciske is a PCI Security Standards Council Qualified Security Assessor at Trustwave. Ciske has been involved in PCI DSS since its introduction to the European region in 2001, when he assisted Visa Europe with the initiation and development of the Visa Account Information Security programme for the European market. Ciske has eight years dedicated experience in information security management (ISO27000) compliance solutions.

👤 **Gunther Bloemen**

Gunther is a Senior Consultant in the Professional Services Organization within Verizon Business Security Solutions. This organization is responsible for providing architecture, assessment, integration and e-business solutions covering all aspects of security and privacy. Gunther has seven years of experience as an IT professional covering diverse aspects of information security. He possesses a wide range of skills and experiences enabling him to perform in multiple roles. The bulk of his security experience is comprised of working with network technologies, conducting risk assessments, preparing for compliance, and creating business continuity plans and security policies. Gunther holds a CISSP certification.

👤 **Claudio Scarabello**

Claudio is a Senior Analyst with Verizon Business Security Solutions specialised in risk management and compliance methodologies. Recent focus has been on market analysis to understand impacts of PCI DSS and related requirements. Particular attention has been paid to demonstration and proof of compliance requirements at the acquiring bank level. As an articulate speaker and educator, he has been involved in information security markets around the globe since 1996 and is regularly consulted on projects for Fortune 500 corporations. Based in Belgium, he holds an Engineering degree from the University of Waterloo, Canada.

👤 **Dieter Sarrazyn**

Dieter is a senior information security consultant currently working for Aszure. His main focus exists in performing penetration tests, performing security assessments, creating and evaluating security architectures, teaching Hacking Inside Out™. Dieter is also team leader of the Risk Management competence centre within Aszure. This competence centre covers all technical assessment services that Aszure provides. In multiple projects regarding security, he performed either one of the following roles: consultant, project manager, auditor, penetration tester or responsible for quality assurance. He is a Certified Information Systems Security Professional (CISSP), a Certified Intrusion Analyst (GCIA), a Certified Incident Handling Analyst (GCIH) and a GIAC Systems and Network Auditor (GSNA). He's also a SANS Local Mentor & SANS Community Instructor.

👤 **Sissel Thomassen**

Sissel is a director of InfoSecure's UK and Scandinavian operations. As a professional, with several years experience in Information Security and Risk assessment, she worked for 10 years with the Norwegian Department of Defence, and has more than 8 years experience in information security within the banking industry in the UK. She has also chaired the Information Security Service (tISS) Management group at The Corporate IT Forum (.tif) Service in the UK. In her career to date, Sissel has had responsibility for the

coordination of PCI DSS compliance activity and awareness training programmes, formulation of information security policy, risk/compliance assessments, third party evaluations and security incident management.

Ms. Thomassen, who obtained the ISEB qualification in Information Security Management Principles in 2005, is currently a Business Candidate in the Bachelor's Degree Program in Management in Norway.

👤 **Pierre Noël**

Pierre has 20+ years experience in the Information Security Industry. Currently, he is the worldwide Evangelist on Information Security & Risk Management for IBM Corp (Software Group). His role in the context of PCI-DSS is to meet up with customers, regulators and IBM teams all over the World; help them to address specific operational risk issues or regulatory constraints such as PCI. He has a pretty broad visibility on PCI-DSS activities worldwide.

Prior to work for IBM, he was respectively

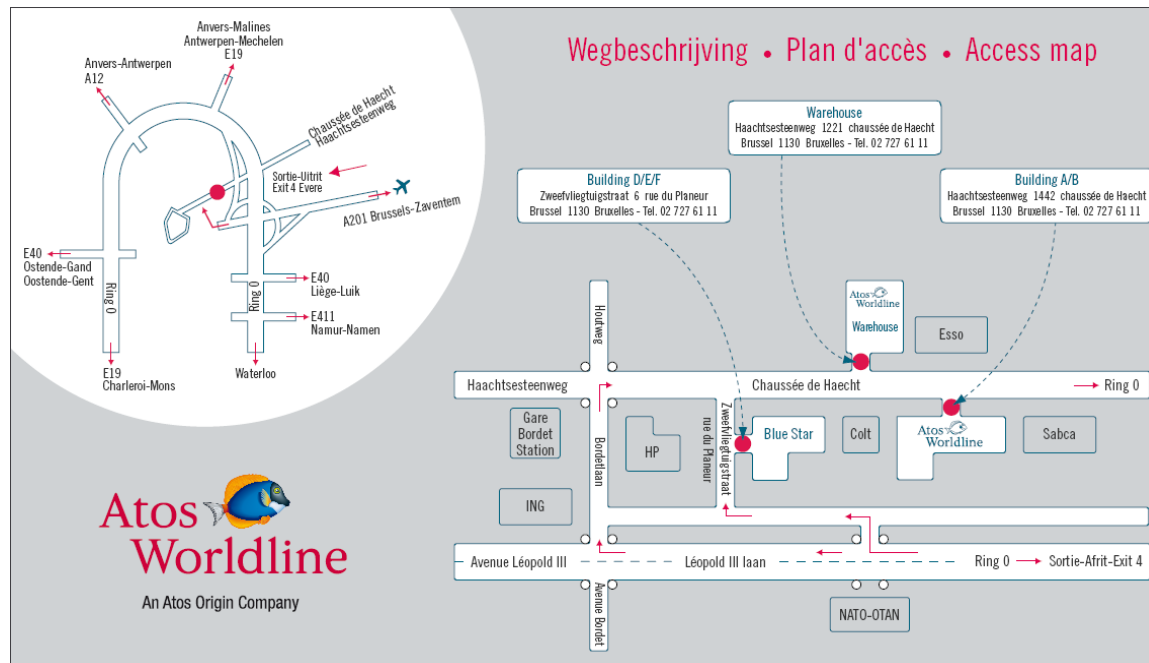

- CEO of The Arial Group - an international organization specialized in Operational Risk Management for Fortune 1000 , with customers like the Hutchison Group, Cathay Pacific, National Australian Bank, HSBC, Visa, AIG...
- CEO of TruSecure Corp (Asia Pacific)
- Vice President in charge of Global Security Consulting (world wide) at Computer Associates

Venue and Location

The conference is hosted by Atos Worldline NV/SA (formerly known as Banksys). The 'Building A/B' is located at Haachtsesteenweg 1442 chaussée de Haecht, Brussel 1130 Bruxelles, close to NATO Headquarters (cf. access map) and only a few kilometres from the Brussels airport (Zaventem). Visitor parking spaces are limited. However, the Atos Worldline buildings are easily reached by public

transport:

From the airport you can take a cab or you can get at walking distance of the venue (NATO) with the Airport Line (12). If you arrive by train in 'Brussels-North' or Brussels-South', tramline 55 brings you to 'Bordet' station which you can also reach with a local train line (Halle - Vilvoorde).
