# Cyber Together Mission

Cyber Together mission is to accelerate growth of the Israeli cyber security innovation by coordinating ecosystem initiatives to connect and integrate objects with people, processes, technologies and data using common IT/OT architectures, interoperability and open standards that lead to transformational of tangible business outcomes and to lead cyber innovation

The 4 Fundamental Pillars – The Nature of Cyber Together

1. Collaboration →Ecosystem
2. Interoperability → Technical References, Open Standards (note : Cyber Together is NOT a standards organization)
3. Experimentation → Cyber Security Test Bed
4. New Business Models → Process

Provided By: Cyber Together

Main Objectives and Activities of Cyber Together

Cyber Together Working Groups

1) Marketing work groups by sectors : finance, healthcare, energy, telecom, utilities, defense, industry, governmental etc.

2) Marketing work groups by geographic : EMEA (DACH, Benelux, UK, Nordic), USA, Canada, Mexico and Latin America, APAC (Japan, Singapore, Korea, Taiwan, China).

3) Security Technology work groups : cloud, mobile, network, APT and end point, cyber intelligence, critical infrastructure, IoT & Smart Cities = IT & OT

4) Innovation work group : will define a cyber security framework, which establish best practices and be used to identify security gaps in existing technologies.

5) Cyber Security Lab work group : test bed use cases, dynamic orchestration of enterprise security and cyber security innovation technologies, establish a reference architecture, identify requirements.
