owasp-community@lists.owasp.org

Global updates

- OWASP PHP Security Training Project
The goal of this project is to create an interactive training system, consisting of several units, for PHP developers. Every unit is divided in an attack and a defense part.

- OWASP Hardened Phalcon Project
The Phalcon Framework is the world's fastest PHP Framework, however, like most frameworks it is not 'hardened' by default. OWASP Hardened Phalcon aims to help developers harden their Phalcon applications in-line with the published OWASP guidelines.

Global updates

- OWASP_AppSensor_Project Book v2 Released!
- ZAP 2.3.1 Released. This is a bugfix release
- OWASP Node Goat Project - First stable release on May 6! - See https://github.com/OWASP/NodeGoat/releases
- OWASP Python Security Project (http://www.pythonsecurity.org/) has decided to support the "Proposal Project Review QA Approach" by creating a tool to satisfy the proposal's requirements.

Multumesc!
